**(100) Service Quality Improvement Reporting
Data Collection Form**

FCC Form 481

OMB Control No. 3060-0986/OMB Control No. 3060-0819

July 2013

<010>	Study Area Code	411785
<015>	Study Area Name	J. B. N. TEL CO INC
<020>	Program Year	2016
<030>	Contact Name - Person USAC should contact regarding this data	R. Norman Johnson
<035>	Contact Telephone Number - Number of person identified in data line <030>	7858663435 ext.
<039>	Contact Email Address - Email Address of person identified in data line <030>	rogerj@jbntelco.com

<110>	Has your company received its ETC certification from the FCC?	(yes / no) <input type="radio"/> <input checked="" type="radio"/>
	If your answer to Line <110> is yes, do you have an existing §54.202(a) "5	
<111>	year plan" filed with the FCC?	(yes / no) <input type="radio"/> <input type="radio"/>

If your answer to Line <111> is yes, then you are required to file a progress report, on line <112> delineating the status of your company's existing § 54.202(a) "5 year plan" on file with the FCC, as it relates to your provision of voice telephony service.

<112> Attach Five-Year Service Quality Improvement Plan or, in subsequent years, your annual progress report filed pursuant to 47 C.F.R. § 54.313(a)(1). If your company is a CETC which only receives frozen support, your progress report is only required to address voice telephony service.

411785ks112.pdf

Name of Attached Document

Please select the appropriate responses below (Yes, No, Not Applicable) to confirm that the attached document(s), on line 112, contains a progress report on its five-year service quality improvement plan pursuant to §54.202(a). The information shall be submitted at the wire center level or census block as appropriate.

- <113> Maps detailing progress towards meeting plan targets
- <114> Report how much universal service (USF) support was received
- <115> How much (USF) was used to improve service quality and how support was used to improve service quality
- <116> How much (USF) was used to improve service coverage and how support was used to improve service coverage
- <117> How much (USF) was used to improve service capacity and how support was used to improve service capacity
- <118> Provide an explanation of network improvement targets not met in the prior calendar year.

**JBN Telephone Company, Inc.
Line 112 – Annual Progress Report on Five-Year Service Quality Improvement Plan**

As required in 47 C.F.R. § 54.313(a)(1), the following pages provide the Company's annual progress report on the five-year service quality improvement plan filed in 2014 with the Form 481 that described the proposed improvements and/or upgrades over the next five years to the applicant's network throughout the Company's service area.

47 C.F.R. § 54.313(a)(1) specifies that recipients should submit "[a] progress report on its five-year service quality improvement plan pursuant to § 54.202(a), including maps detailing its progress towards meeting its plan targets, an explanation of how much universal service support was received and how it was used to improve service quality, coverage, or capacity, and an explanation regarding any network improvement targets that have not been fulfilled in the prior calendar year. The information shall be submitted at the wire center level or census block as appropriate."

This document describes the Company's progress report on the five-year plan, pursuant to 47 C.F.R. §54.313(a)(1), including maps explaining the Company's progress towards meeting deployment targets, the amount of universal service support received, how support was used to improve service quality, coverage, or capacity, and an explanation regarding any network improvement targets that have not been fulfilled in the prior calendar year. The information regarding the total amount of universal service support received is broken out separately by the amount spent on capital expenses and the amount spent on operating expenses. The information regarding planned and/or completed network improvements shall be at the wire center level or census block, as appropriate.

QUANTIFICATION OF AMOUNT OF USF SPENT ON CAPITAL VERSUS OPERATING EXPENSES:

Line 114 of Form 481 requests a quantification of how much USF was received for the Company's service area and that the amount be broken out separately by the amount spent on capital expenditures and the amount spent on operating expenses. For the period from January 1, 2015 through June 24, 2015, the Company is expected to receive \$482,000 in federal USF revenue, including High Cost Loop Support ("HCLS"), Interstate Common Line Support ("ICLS") and Connect America Funds (CAF") which is used approximately \$412,000 for capital expenditures and \$70,000 to cover a portion of the Company's operating expenses. Please note that since the instructions were to provide data up to the filing date of the Form 481, these numbers, as well as the data on the following pages are estimates since the general accounting books of the Company are not closed for June 2015 as of the date of this filing.

JBN Telephone Company, Inc.

Line 112 – Five-Year Service Quality Improvement Plan (Cont'd)

QUANTIFICATION OF AMOUNT OF USF SPENT TO IMPROVE SERVICE QUALITY:

Line 115 of Form 481 requests that the progress report specify how much USF support was used to improve service quality, at the wire center level or census block, as appropriate. The Company improved service quality in numerous ways, but primarily by investing in the following capital expenditures to increase the broadband speed available to customers:

JBN Telephone Company, Inc.

Line 112 – Five-Year Service Quality Improvement Plan (Cont'd)

QUANTIFICATION OF AMOUNT OF USE SPENT TO IMPROVE SERVICE COVERAGE:

Line 116 of Form 481 requests that the progress report specify how much USF support was used to improve service coverage, at the wire center level or census block, as appropriate. As of June 24, 2015, the Company's service coverage was generally close to 70% of our service territory at 4 Mbps downstream and 1 Mbps Upstream ("4/1"). Therefore, most of the capital expenditures are to improve service capacity rather than service coverage. The following summarizes how support was used for capital expenditures to improve service coverage:

[illegible]

Line 112 – Five-Year Service Quality Improvement Plan (Cont'd)

QUANTIFICATION OF AMOUNT OF USF SPENT TO IMPROVE SERVICE CAPACITY:

Line 117 of Form 481 requests that the progress report specify how much USF support was used to improve service capacity, at the wire center level or census block, as appropriate. The following summarizes how support was used for capital expenditure to improve service capacity.

Line 112 – Five-Year Service Quality Improvement Plan (Cont'd)

Please note that the answers to lines 115, 116 and 117 overlap and are very difficult to differentiate. When you install or upgrade additional fiber and DLCs, you typically improve service quality, provide additional service coverage and increase service capacity. It is only an approximation to separately identify if the fiber and DSL increased service quality versus improving service coverage or increasing service capacity. There is an overlap in the responses for lines 115, 116 and 117. Since most of the Company's customers can receive 4/1, it is not typically increasing service coverage, but rather, it is generally service capacity and overall quality of service that is improved.

EXPLANATION OF ACHIEVEMENT OF NETWORK IMPROVEMENT OBJECTIVES:

Line 118 requests an explanation of reasons why network improvement targets were not achieved, if applicable, at the wire center level or census block, as appropriate. While the five-year plan filed in 2014 did not have half-year projections, the Company believes it is currently on track to meet the annual 2015 plan. Of course, circumstances for the remainder of 2015 can change where it is not able to meet its network improvement objectives primarily for the following reasons (not in any particular order):

- 1) **Permits:** It is not possible to predict the ability to obtain all necessary permits, including easements and rights-of-way, within the five-year time-frame required to complete the capital expenditures included in the Company's five-year plan. Permits can be, and often are, delayed significantly by various governmental agencies and those delays are totally outside the control of the Company.
- 2) **Weather Issues:** It is not possible to predict the impact of the weather on the installation of the capital expenditures included in the Company's five-year plan. For example, if the ground is frozen, the timing of installing facilities can be significantly delayed and those delays are totally outside the control of the Company.
- 3) **Lead Time to Obtain Materials from Vendors:** It is not possible to predict when a material critical for the capital expenditures included in the Company's five-year plan may come into a shortage situation. For example, currently the industry is experiencing a shortage of fiber optic cable where there is a significant lead time to obtain fiber optic cable. Delays of this nature are impossible to predict and are totally outside the control of the Company.
- 4) **Lead time to get Contractors to Install Facilities:** Just as with the materials, the Company has experienced times when it was not able to obtain contractors to install the equipment because the Company is not large enough compared to other firms wanting the contractor to do work for them. Therefore, the Company had to wait until much later than anticipated to get the contractor to come install the facilities for them. Once again, delays of this nature are impossible to predict and are totally outside the control of the Company.

JBN Telephone Company, Inc.

Line 112 – Five-Year Service Quality Improvement Plan (Cont'd)

PROGRESS REPORT ON THE FIVE-YEAR PLAN:

As described in the five-year plan, the Company provides service primarily through the use of fiber optic cable and electronics between the central offices and between the central offices and the subscriber terminal equipment (e.g., Digital Loop Carriers ("DLCs")) in the field. Copper cable is still in use and most frequently, the last mile facilities are generally provided over copper. The Company has a certain amount of fiber-to-the-premise ("FTTP") facilities, as well. It is the company's intention to continue to install fiber optic cable and electronics, wherever feasible. The company has begun the transition from the TDM-based network to an IP-network and is continually assessing the most cost-effective technology solutions to provide our customers the services they request.

Each exchange in the company only has one wire center; therefore, the progress report on the five-year plan is presented at the exchange level (which is also the wire center level). Estimated regulated capital expenditures for the RLEC from January 1, 2015 through June 24, 2015, as projected as part of the total 2015 capital expenditures in the five-year plan filed in 2014, in each of the Company's exchanges are estimated to be as follows:

JBN Telephone Company, Inc.

Line 112 – Five-Year Service Quality Improvement Plan (Cont'd)

Line 112 – Five-Year Service Quality Improvement Plan (Cont'd)

COMMUNITY ANCHOR INSTITUTIONS:

Line 3011 of the Form 481 requests per 47 C.F.R. § 54.313(e)(ii), the number, names, and addresses of community anchor institutions to which the ETC began offering broadband service in the preceding calendar year. The Company already provides broadband service to all of the community anchor institutions in the serving area. If the community anchor institution requests increased bandwidth, the Company works with the institution to determine and supply the broadband service that best fits the needs of the institution. No new community anchor institutions received broadband service from the Company in the preceding calendar year.

CONCLUSION:

The Company's is doing an excellent job progressing on the five-year service quality improvement plan filed in 2014 with the FCC with the Form 481. The Company is continuing to improve and upgrade facilities in order to provide customers with the highest quality voice and broadband service in the most cost-effective manner. This includes shortening the length of the loops, as needed, in order to provide greater bandwidth to the customer, augmenting and upgrading the interexchange facilities, as needed, to provide greater speeds and sufficient facilities for special access circuits, including, but not limited to, dedicated facilities to wireless towers, modifying switching equipment, as needed, in order to provide the services and features desired by the customer, and adding/replacing general support equipment, as needed, in order to continue to operate as a company and provide service to the end user.

The maps attached to the end of this report show the status of the projects performed from January 1, 2015 through June 24, 2015, including a description of the stage the project (e.g., project engineered versus project completed).

411785ks330

JBN Telephone Company, Inc.

Line 330 – Unfulfilled Broadband Service Requests Resolution

As required in 47 C.F.R. § 54.313(a)(3), the following provides the detailed description of how the Company attempted to provide service to potential customers whose initial requests for service were unfulfilled in 2014 in the service area in which the Company is designated as an ETC for facilities that the Company owns, operates, leases, or otherwise utilizes.

UNFILED BROADBAND SERVICE REQUESTS – The Company had 60 unfiled broadband service requests as of December 31st, 2014 which generally fit into the following three categories.

- A. Some unfiled requests were due to customer issues such as the customer does not have a structure yet, the customer was not ready, the customer has not provided an easement, the customer is on BIA land and needs to open the ditch for the Company, etc.
- B. Some unfiled request was due to pending state highway permits.
- C. Most unfulfilled requests are receiving service just not at the higher speed they would like at this time. Due to the loop length.

GENERAL PROCESS: The first step in the process of providing service was to have the Company's technical staff determine if current facilities exist to the customer location that are capable of providing broadband service and what the maximum broadband speed that could be provided. The Company has extremely long loops in some of the most rural portions of our territory and broadband speed is extremely distance sensitive.

Based on the analysis, once it was determined that facilities do not currently exist or that the distance is too great to provide broadband, a route upgrade feasibility analysis is prepared including an estimate of what facilities would be needed and the cost to build to the customer.

DELAYS DUE TO PERMITS: In some cases, service installations become delayed due to permit(s) that are required to install the new facilities. The Company works with a myriad of government agencies and cannot install new facilities absent the appropriate government permit(s). In those cases, the Company informs the customer that we are awaiting permit(s) and that the facilities will be installed once the appropriate permit(s) are obtained. In some cases, the governmental agency has taken multiple years to approve permit(s).

Please note that since the Company's territory is extremely rural, in areas where the Company does not own facilities, it is not possible to lease facilities from other companies since there are no other service providers in those extremely remote areas.

411785ks510

JBN Telephone Company, Inc.

Line 510 –Compliance with Service Quality Standards and Consumer Protection

As required in 47 C.F.R. § 54.313(a)(5) for High-cost Recipients, the following is a detailed description of how the Company complies with Service Quality Standards and Consumer Protection Rules.

SERVICE QUALITY STANDARDS: The Company abides by the State Commission's requirements for service quality. All required reporting is done with the Company in full compliance of the service quality standard requirements.

CONSUMER PROTECTION RULES:

The Company developed and implemented a Customer Proprietary Network Information ("CPNI") Compliance Manual and has appointed a CPNI Compliance Officer. Annually, the Company requires all employees to certify that they have reviewed and understand the CPNI Compliance Manual and that they understand that any violation of the Company's CPNI procedures may result in disciplinary action up to and including dismissal. The Company files an annual report with the Federal Communications Commission ("FCC") certifying compliance with the FCC's CPNI rules.

The Company also developed and implemented an Identity Theft Prevention Program Manual and has appointed a Red Flag Coordinator. Annually, the Company requires all employees certify that they have reviewed and understand the Identity Theft Prevention Program Manual. Further, employees must certify that they understand that any violation of the Company's identity theft prevention procedures may result in disciplinary action up to and including dismissal.

411785ks610

JBN Telephone Company, Inc.
Line 610 – Functionality in Emergency Situations

As required in 47 C.F.R. § 54.313(a)(6) for all high cost recipients, which includes the Company, and as set forth in 47 C.F.R. § 54.202(a)(2), the following provides a detailed description demonstrating that the Company has the ability to remain functional in emergency situations, including a demonstration that 1) it has a reasonable amount of back-up power to ensure functionality without an external power source, 2) is able to reroute traffic around damaged facilities, and 3) is capable of managing traffic spikes resulting from emergency situations.

OVERALL RESPONSE TO EMERGENCY SITUATIONS: The Company has a comprehensive disaster recovery plan (also called a “continuity plan”) that was developed and implemented for the Company specifically to deal with emergencies. It has detailed, specific steps that are to be taken for each type of emergency.

POWER: In order to function in an emergency, the Company has a combination of batteries and emergency generators. Some locations have permanent emergency generators with fuel tanks; whereas, other locations require a portable generator to be brought to the location to recharge the on-site batteries. The company owns several portable generators that technicians can take out to recharge the batteries. For example, the company’s central offices have automatic stand-by generators to run the entire offices. The digital loop carrier (“DLC”) sites also have battery back-up.

REROUTING TRAFFIC AND REDUNDANCY: The Company has established 100% redundant E-911 trunks and SS-7 routes. In addition, the network was designed with redundancy, wherever possible, especially in the backbone network. Where it is not redundant, the Company has the ability to redirect most backbone traffic. In cases where there is no redundancy, it is due to the extreme cost of a 100% redundant network. For example, the loop to the customer location is typically not redundant, especially for residential customers. This is because it would not be cost effective to build totally separate facilities for the “last mile” to the customer.

MANAGING TRAFFIC SPIKES: The Company realizes that when a catastrophe happens, everyone immediately tries to contact friends and family to make certain they are all right. The Company has designed the network to have excess capacity on its backbone network. For example, on Mother’s Day, the company handles traffic without the customer receiving the “All Trunks Busy” message which demonstrates the Company’s ability to handle peak traffic spikes.

JBN Telephone Company
Line 920 – Tribal Land Issues

As required in 47 C.F.R. § 54.313(a)(9), the following provides the detailed description of the efforts by the Company related to discussions with Tribal governments that, at a minimum, included: (i) A needs assessment and deployment planning with a focus on Tribal community anchor institutions; (ii) Feasibility and sustainability planning; (iii) Marketing services in a culturally sensitive manner; (iv) Rights of way processes, land use permitting, facilities siting, environmental and cultural preservation review processes; and (v) Compliance with Tribal business and licensing requirements. Tribal business and licensing requirements include business practice licenses that Tribal and non-Tribal business entities, whether located on or off Tribal lands, must obtain upon application to the relevant Tribal government office or division to conduct any business or trade, or deliver any goods or services to the Tribes, Tribal members, or Tribal lands. These include certificates of public convenience and necessity, Tribal business licenses, master licenses, and other related forms of Tribal government licensure.

Line 921 – Needs Assessment and Deployment Planning: The Company's actions to address needs assessment and deployment planning with a focus on tribal community anchor institutions for the tribal land network are as follows: On June 3rd 2015 the Company contacted the Kickapoo tribal office who recommended the Company speak with Ed Berger, the Tribe Accountant. A minimum of 5 phone calls were made to Mr. Berger between the dates of June 3rd and June 4th 2015. The Company made contact with Mr. Berger on June 4th 2015 who stated they had no need for any services to be added or updated at this time.

Line 922 – Feasibility and Sustainability Planning: The Company's actions to address feasibility and sustainability planning for the tribal land network are as follows: As discussed above, the JBN Telephone Company's limited success with Tribal engagement has minimized Tribal supported initiatives associated with facility expansion to provide additional or increased service offerings.

Line 923 – Marketing Services in a Culturally Sensitive Manner: The Company's actions to address the marketing of services in a culturally sensitive manner in the tribal land are as follows: As discussed above, JBN Telephone Company tried, with limited success, to engage the Tribe to discuss if the Tribe had any suggestions or ideas for improving the company's marketing efforts.

Line 924 – Compliance with Right of Way Processes: The Company's actions to comply with the right-of-way processes for the tribal lands are as follows: As discussed above, the Company tried, with limited success, to engage the Tribe to discuss right-of-way processes for its tribal lands. Historically, JBN Telephone Company has complied with any regulations, set forth by the Kickapoo Tribe and has consistently sought approval prior to commencement of any construction and/or maintenance activities.

Line 925 – Compliance with Land Use Permitting Requirements: The Company's actions to comply with the land use permitting requirements for the tribal lands are as follows: As discussed above, the Company tried, with limited success, to engage the Tribe to discuss compliance with the land use permitting requirements for its tribal lands. As identified on Line 924, JBN Telephone Company has complied with any regulations, set forth by the Kickapoo Tribe and has consistently sought approval prior to commencement of any construction and/or maintenance activities.

Line 926 – Compliance with Facility Siting Rules: The Company's actions to comply with the facilities siting rules for the tribal lands are as follows: As discussed above, the Company tried, with limited success, to engage the Tribe to discuss and establish requirements and define compliance with the siting

rules for its tribal lands. As identified on Line 924, JBN Telephone Company has complied with any regulations, set forth by the Kickapoo Tribe and has consistently sought approval prior to commencement of any construction and/or maintenance activities.

Line 927 – Compliance with Environmental Review Processes: The Company's actions to comply with the environmental review processes for the tribal lands are as follows: As discussed above, the Company tried, with limited success, to engage the Tribe to discuss compliance with the environmental review processes for its tribal lands. As identified on Line 924, JBN Telephone Company has complied with any regulations, set forth by the Kickapoo Tribe and has consistently sought approval prior to commencement of any construction and/or maintenance activities.

Line 928 – Compliance with Cultural Preservation Review Processes: The Company's actions to comply with the cultural preservation review processes for the tribal lands are as follows: As discussed above, the Company tried, with limited success, to engage the Tribe to discuss compliance with the cultural preservation review processes for its tribal lands. As identified on Line 924, JBN Telephone Company has complied with any regulations, set forth by the Kickapoo Tribe and has consistently sought approval prior to commencement of any construction and/or maintenance activities.

Line 929 – Compliance with Tribal Business and Licensing Requirements: The Company's actions to comply with the tribal business and licensing requirements for the tribal lands are as follows: As discussed above, the Company tried, with limited success, to engage the Tribe to discuss if the Tribe believes there are other licenses the Company should acquire to provide telecommunications services on its tribal lands.

**JBN Telephone Company, Inc.
Line 1010 – Voice Services Rate Comparability**

As required in 47 C.F.R. § 54.313(a)(10), any recipient of high-cost support shall provide a letter certifying that the pricing of the company's voice services is no more than two standard deviations above the applicable national average urban rate for voice services, as specified in the most recent public notice issued by the Wireline Competition Bureau and Wireless Telecommunications Bureau.

The following provides the Company's support for Line 1010 - Description of Voice Service Rate Comparability.

The Company charges the following fixed voices prices:

Flat Rate Residential Service	\$16.75
State Residential Subscriber Line Charge	0.00
State Universal Service Charge Fee	1.44
Mandatory Extended Area Service	0.20
Residential Federal Subscriber Line Charge	<u>6.50</u>
Total Residential Fixed Voice Charges	<u>\$24.89</u>

Since the total for residential fixed voice that the Company charges, as shown above, is below the \$47.48, which is the reasonable comparability benchmark for voice services announced by the FCC Wireline Competition Bureau in the Public Notice released on April 16, 2015 (DA 15-470), the Company hereby certifies that it is in compliance with 47 C.F.R. § 54.313(a)(10).

JBN Telephone Company Lifeline Terms and Conditions

The Lifeline Service Program (Lifeline), sponsored by the FCC is a program designed to maintain and preserve universal service by providing a reduction in the price of basic residential exchange service to qualifying low-income customers. The Company's voice lifeline plan includes unlimited local minutes-of-use within the toll-free calling area. The Company's voice lifeline plan does not include any free minutes-of-use for toll.

A. GENERAL

1. Lifeline is a federally funded reduction of basic local residential service. The Federal credit amount (CR) provided to Lifeline subscribers will be the maximum amount authorized by the FCC.
 - a. Lifeline customers will also receive additional Lifeline Service reductions in intrastate local service of \$7.77.
 - b. In no event shall the Local Exchange access service rate be reduced below zero.
2. Local service for Lifeline customers may not be disconnected for nonpayment of toll charges.
 - a. Toll Restriction Service will be provided to Lifeline customers at no charge.
 - b. Lifeline customers are not required to accept Toll Restriction Service as a condition to avoid disconnection of local service for non-payment of toll.
 - c. Lifeline customers are not required to pay a deposit in order to obtain local service if the customer voluntarily elects installation of Toll Restriction Service.
3. Partial payment from Lifeline customers will be applied first to local service charges and then to toll charges.
4. Lifeline customers will not be denied reestablishment of service on the basis that the customer was previously disconnected for non-payment of toll charges.
5. Lifeline will not be furnished on a Foreign Exchange service arrangement.

B. ELIGIBILITY REQUIREMENTS

1. Lifeline will be provided for on (1) telephone line per household, at the customer's principal place of residence who have only on local exchange access line to his/her residential premises or dwelling place. * Verification of this requirement will be through self-certification.
2. Show that he/she is currently a recipient of benefits from one of the following public assistance programs:
 - Federal Public Housing Assistance/Section 8
 - Low Income Home Energy Assistance Program (LIHEAP)
 - Supplemental Nutrition Assistance Program
 - General Assistance
 - Supplemental Security Income (SSI)
 - Temporary Assistance to Needy Families (TAR)
 - Medicaid
 - Food Distribution Program
 - Free School Lunch Program
 - Individuals living on tribal land receiving:
 - Food Distribution Program
 - Bureau of Indian Affairs General Assistance
 - Tribally administered Temporary Assistance for Needy Families (TANF)
 - Head Start (tribal programs for only those meeting its income qualifying standard)
 - Tribally administered Free School Lunch Program

Individuals choosing this option must obtain and provide to the Telephone Company a copy of a valid identification card or the appropriate documents that are issued to them by the agency administering the program.

Income Eligibility

A customer shall be eligible for the Lifeline Service Program if that customer's household annual income level is at or below 150% of the federal poverty level. Such customers may obtain a form from the Telephone Company suitable for self-certification of income level and provide the completed form to the Company to begin service under the program. Proof of income is required. Acceptable documentation may include the prior years federal, state, or tribal tax return, or other forms of income certification. Customers should contact the Company for specific details.

Certification

- O. The customer will certify eligibility for Lifeline Service. Recertification is required annually or at any time the qualifying criteria for the customer changes.

Recipients of Lifeline Service must notify the Telephone Company when they no longer qualify for Lifeline Service. Upon receipt of the notification, the Telephone Company will discontinue Lifeline Service.

If the Telephone Company discovers that conditions exist that disqualify the recipient of Lifeline Service, local service will be billed at the full rate. The customer will be billed retroactively either to the date Lifeline Service commenced or the date the recipient no longer qualified for the service, not to exceed twelve (12) months.

* A residential premises or dwelling place is that location where a customer resides, even if such residential premises or dwelling place is only a single room. Lifeline will not be provided if the customer has access to other local exchange telephone service within the residential premises or dwelling place, provided/owned by himself/herself or owned/provided by others. However, it can be determined by the Telephone Company that access to other existing local exchange telephone service owned/provided by others is virtually denied, or is inaccessible to the customer, then Lifeline Service will be provided.

JBN Telephone Company, Inc.
Line 3010 – Annual Progress Report on Five-Year Service Quality Improvement Plan –
Milestone Certification

As required in 47 C.F.R. § 54.313(a)(1), the following pages provide the Company's annual progress report on the five-year service quality improvement plan filed in 2014 with the Form 481 that described the proposed improvements and/or upgrades over the next five years to the applicant's network throughout the Company's service area.

47 C.F.R. § 54.313(a)(1) specifies that recipients should submit "[a] progress report on its five-year service quality improvement plan pursuant to § 54.202(a), including maps detailing its progress towards meeting its plan targets, an explanation of how much universal service support was received and how it was used to improve service quality, coverage, or capacity, and an explanation regarding any network improvement targets that have not been fulfilled in the prior calendar year. The information shall be submitted at the wire center level or census block as appropriate."

This document describes the Company's progress report on the five-year plan, pursuant to 47 C.F.R. §54.313(a)(1), including maps explaining the Company's progress towards meeting deployment targets, the amount of universal service support received, how support was used to improve service quality, coverage, or capacity, and an explanation regarding any network improvement targets that have not been fulfilled in the prior calendar year. The information regarding the total amount of universal service support received is broken out separately by the amount spent on capital expenses and the amount spent on operating expenses. The information regarding planned and/or completed network improvements shall be at the wire center level or census block, as appropriate.

QUANTIFICATION OF AMOUNT OF USF SPENT ON CAPITAL VERSUS OPERATING EXPENSES:

Line 114 of Form 481 requests a quantification of how much USF was received for the Company's service area and that the amount be broken out separately by the amount spent on capital expenditures and the amount spent on operating expenses. For the period from January 1, 2015 through June 24, 2015, the Company is expected to receive \$482,000 in federal USF revenue, including High Cost Loop Support ("HCLS"), Interstate Common Line Support ("ICLS") and Connect America Funds (CAF") which is used approximately \$412,000 for capital expenditures and \$70,000 to cover a portion of the Company's operating expenses. Please note that since the instructions were to provide data up to the filing date of the Form 481, these numbers, as well as the data on the following pages are estimates since the general accounting books of the Company are not closed for June 2015 as of the date of this filing.

JBN Telephone Company, Inc.

Line 3010 – Five-Year Service Quality Improvement Plan (Cont'd) – Milestone Certification

QUANTIFICATION OF AMOUNT OF USF SPENT TO IMPROVE SERVICE QUALITY:

Line 115 of Form 481 requests that the progress report specify how much USF support was used to improve service quality, at the wire center level or census block, as appropriate. The Company improved service quality in numerous ways, but primarily by investing in the following capital expenditures to increase the broadband speed available to customers:

Line 3010 – Five-Year Service Quality Improvement Plan (Cont'd) – Milestone Certification

QUANTIFICATION OF AMOUNT OF USF SPENT TO IMPROVE SERVICE CAPACITY:

Line 117 of Form 481 requests that the progress report specify how much USF support was used to improve service capacity, at the wire center level or census block, as appropriate. The following summarizes how support was used for capital expenditure to improve service capacity.

Line 3010 – Five-Year Service Quality Improvement Plan (Cont'd) – Milestone Certification

Please note that the answers to lines 115, 116 and 117 overlap and are very difficult to differentiate. When you install or upgrade additional fiber and DLCs, you typically improve service quality, provide additional service coverage and increase service capacity. It is only an approximation to separately identify if the fiber and DSL increased service quality versus improving service coverage or increasing service capacity. There is an overlap in the responses for lines 115, 116 and 117. Since most of the Company's customers can receive 4/1, it is not typically increasing service coverage, but rather, it is generally service capacity and overall quality of service that is improved.

EXPLANATION OF ACHIEVEMENT OF NETWORK IMPROVEMENT OBJECTIVES:

Line 118 requests an explanation of reasons why network improvement targets were not achieved, if applicable, at the wire center level or census block, as appropriate. While the five-year plan filed in 2014 did not have half-year projections, the Company believes it is currently on track to meet the annual 2015 plan. Of course, circumstances for the remainder of 2015 can change where it is not able to meet its network improvement objectives primarily for the following reasons (not in any particular order):

- 1) **Permits:** It is not possible to predict the ability to obtain all necessary permits, including easements and rights-of-way, within the five-year time-frame required to complete the capital expenditures included in the Company's five-year plan. Permits can be, and often are, delayed significantly by various governmental agencies and those delays are totally outside the control of the Company.
- 2) **Weather Issues:** It is not possible to predict the impact of the weather on the installation of the capital expenditures included in the Company's five-year plan. For example, if the ground is frozen, the timing of installing facilities can be significantly delayed and those delays are totally outside the control of the Company.
- 3) **Lead Time to Obtain Materials from Vendors:** It is not possible to predict when a material critical for the capital expenditures included in the Company's five-year plan may come into a shortage situation. For example, currently the industry is experiencing a shortage of fiber optic cable where there is a significant lead time to obtain fiber optic cable. Delays of this nature are impossible to predict and are totally outside the control of the Company.
- 4) **Lead time to get Contractors to Install Facilities:** Just as with the materials, the Company has experienced times when it was not able to obtain contractors to install the equipment because the Company is not large enough compared to other firms wanting the contractor to do work for them. Therefore, the Company had to wait until much later than anticipated to get the contractor to come install the facilities for them. Once again, delays of this nature are impossible to predict and are totally outside the control of the Company.

Line 3010 – Five-Year Service Quality Improvement Plan (Cont'd) – Milestone Certification

PROGRESS REPORT ON THE FIVE-YEAR PLAN:

As described in the five-year plan, the Company provides service primarily through the use of fiber optic cable and electronics between the central offices and between the central offices and the subscriber terminal equipment (e.g., Digital Loop Carriers ("DLCs")) in the field. Copper cable is still in use and most frequently, the last mile facilities are generally provided over copper. The Company has a certain amount of fiber-to-the-premise ("FTTP") facilities, as well. It is the company's intention to continue to install fiber optic cable and electronics, wherever feasible. The company has begun the transition from the TDM-based network to an IP-network and is continually assessing the most cost-effective technology solutions to provide our customers the services they request.

Each exchange in the company only has one wire center; therefore, the progress report on the five-year plan is presented at the exchange level (which is also the wire center level). Estimated regulated capital expenditures for the RLEC from January 1, 2015 through June 24, 2015, as projected as part of the total 2015 capital expenditures in the five-year plan filed in 2014, in each of the Company's exchanges are estimated to be as follows:

JBN Telephone Company, Inc.

Line 3010 – Five-Year Service Quality Improvement Plan (Cont'd) – Milestone Certification

COMMUNITY ANCHOR INSTITUTIONS:

Line 3011 of the Form 481 requests per 47 C.F.R. § 54.313(e)(ii), the number, names, and addresses of community anchor institutions to which the ETC began offering broadband service in the preceding calendar year. The Company already provides broadband service to all of the community anchor institutions in the serving area. If the community anchor institution requests increased bandwidth, the Company works with the institution to determine and supply the broadband service that best fits the needs of the institution. No new community anchor institutions received broadband service from the Company in the preceding calendar year.

CONCLUSION:

The Company's is doing an excellent job progressing on the five-year service quality improvement plan filed in 2014 with the FCC with the Form 481. The Company is continuing to improve and upgrade facilities in order to provide customers with the highest quality voice and broadband service in the most cost-effective manner. This includes shortening the length of the loops, as needed, in order to provide greater bandwidth to the customer, augmenting and upgrading the interexchange facilities, as needed, to provide greater speeds and sufficient facilities for special access circuits, including, but not limited to, dedicated facilities to wireless towers, modifying switching equipment, as needed, in order to provide the services and features desired by the customer, and adding/replacing general support equipment, as needed, in order to continue to operate as a company and provide service to the end user.

The maps attached to the end of this report show the status of the projects performed from January 1, 2015 through June 24, 2015, including a description of the stage the project (e.g., project engineered versus project completed).
